

PROFESSIONAL PROFILE

Visual designer and developer with over 7 years of professional experience designing, building, and maintaining websites and marketing emails, as well as creating graphics and illustrations for various platforms. I like to solve problems, while helping people tell their stories, and having fun along the way.

Bridging the gap between "how it works" and "what it looks like" is my specialty. I am seeking a designer or developer position which allows me to apply my knowledge in both areas.
